## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 28-32, 36-39, 41-45 and 47-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 28 and 42 recite that the transfer bias for the toner patch image is changeable in accordance with a density of the toner patch image. Obviously, the transfer bias for the toner patch cannot be changed at the same time the density is being detected as is recited. Further, means to obtain the “density to be used to form the toner patch image” has not been recited since the density detecting means detects the density of the toner patch that already has been transferred to the transfer medium. Appropriate correction is required.
